the book culture evolution and menopause focuses on the crossroads of anthropology the history of civilization and evolutionary biology p culture is usually seen as opposing biological imperatives humans have always tried to overcome the burden of environmental and their own biological limits by developing science and technology and by building communities the culture of care that humanity established supersedes the biological costs and benefits that govern life for other species thus humans have founded a new trajectory within which biology becomes of lesser significance this book re examines these perceptions to conclude that the traditional dichotomy between nature and nurture is a false one nurture represents an indispensable component of human nature from a biological perspective this nurturing nature sets as its objective the elimination of the impact of natural selection aiming for the perseverance of our species against all forces that may instruct otherwise by canceling the translation of potential differences in biological performance or fitness into differences in reproductive success humans for the first time on earth have defeated the typical logic that guides evolution this disruption of the link between biology and fate results in an existentialist crisis to resolve it people must re examine their position in the world and their individual and collective goals the book starts with a discussion of the concept of randomness and how this applies to biology then it delves into a description of how the culture of care dominates the history of h sapiens focusing on the west intrinsic controversies of modernity are discussed such as the concurrent pursuit of reason and individual advancement or the annulment of the interpretation of resource abundance into population

growth the book concludes with some paradoxical consequences of the defeat of evolutionary logic and the emergence of biological existentialism as the overarching state of our being

memetics is the name commonly given to the study of memes a term originally coined by richard dawkins to describe small inherited elements of human culture memes are the cultural equivalent of dna genes and memetics is the cultural equivalent of genetics memes have become ubiquitous in the modern world but there has been relatively little proper scientific study of how they arise spread and change apparently due to turf wars within the social sciences and misguided resistance to darwinian explanations being applied to human behaviour however with the modern explosion of internet memes i think this is bound to change with memes penetrating into every mass media channel and with major companies riding on their coat tails for marketing purposes social scientists will surely not be able to keep the subject at arm s length for much longer this will be good because an understanding of memes is important memes are important for marketing and advertising they are important for defending against marketing and advertising they are important for understanding and managing your own mind they are important for understanding science politics religion causes propaganda and popular culture memetics is important for understanding the origin and evolution of modern humans it provides insight into the rise of farming science industry technology and machines it is important for understanding the future of technological change and human evolution this book covers the basic concepts of memetics giving an overview of its history development applications and the controversy that has been associated with it

this book explores developing practice in the public presentation of the world heritage of the roman frontiers written by leading practitioners from the uk the netherlands germany and serbia
